MUBARAQ SANUSI

AI Engineer | NLP/LLMs | Production RAG Systems | Python,
PyTorch | Ex-Backend Engineer
Ibadan South West, Oyo State, Nigeria

Summary

ML Engineer specializing in NLP and LLM applications. I build production RAG systems, fine-tune language models, and deploy AI solutions that solve real business problems.

Background: 5 years as a backend engineer building scalable systems at ICE Commercial Power and other companies. At ICE, I collaborated with data scientists on energy optimization models, working with large datasets and building pipelines to support ML workloads. This experience sparked my transition into ML engineering.

Current focus: Production-grade NLP systems — retrieval-augmented generation (RAG), fine-tuning open-source LLMs, and deploying language models at scale. I bring a production engineer's mindset to ML: systems that are robust, monitored, and cost-efficient.

Tech stack: Python, PyTorch, Hugging Face Transformers, LangChain, FastAPI, Vector Databases (Pinecone, Qdrant), AWS/GCP. Previously: PHP/Laravel, system architecture, DevOps.

Experience

Farmatrix Agro

Chief Technology Officer

January 2020 - Present (6 years 3 months)

Nigeria

SupliGO Energy

Lead Software Engineer

June 2024 - January 2026 (1 year 8 months)

Koyn

Software Engineer

October 2023 - January 2026 (2 years 4 months)

Developing and maintaining high-performance, scalable, and secure backend services using PHP/Laravel.

Designing and optimizing database schemas and queries with MySQL to ensure data integrity and efficient retrieval.

Implementing and managing APIs that facilitate seamless communication between our frontend applications and third-party services.

Ensuring the security of user data and transactions through robust authentication, authorization, and encryption mechanisms.

Collaborating with cross-functional teams, including product managers, frontend developers, and designers, to translate product requirements into technical specifications and deliver impactful features.

Troubleshooting, debugging, and resolving issues to maintain the stability and reliability of our production systems hosted on DigitalOcean.

Contributing to the continuous improvement of our development processes, code quality, and system architecture.

Abango Technologies Limited

Software Engineer

January 2022 - June 2024 (2 years 6 months)

Nigeria

ICE Commercial Power

Software Engineer

June 2021 - April 2022 (11 months)

Nigeria

- Researching, creating, testing and documenting IoT solutions.
- Designing, coding and testing features of IoT devices.
- Providing solutions to issues related to the connection of networks and platforms.

- Work with Data Scientists on large, complex energy data sets, analyzing user needs and working as service designers.
- Solve difficult, non-routine analysis problems, applying advanced coding methods as needed.
- Conduct end-to-end analysis that includes data processing, analysis, and presentations.
- Make recommendations with effective presentations of findings through visual displays of quantitative information.
- Research and develop analytical, forecasting, and optimization methods to improve the quality of ICE's user facing products.
- Enhancing analytic procedures to include tools that are relevant for building effective analytic systems.
- Managing company website.
- Developing and implementing company IT strategy.

CoLab Innovation Hub

Software Developer

January 2019 - January 2022 (3 years 1 month)

Kaduna, Kaduna, Nigeria

Worked on programmes to train people of all ages to become software engineers through lectures and project based learning.

Created, delivered and maintained scalable system architecture to support a high-availability internet site with various internal applications.

Built databases and table structures following n-tier architecture methodology for web applications.

Collaborated with product management to design, build and test systems.

Performed GAP analysis by identifying existing technologies, documenting the enhancements to meet the end state requirements

Google

Google Developer Group Lead

January 2017 - September 2018 (1 year 9 months)

Nigeria

Promote Google Products, tools and services to students in my School

Education

University of Ilorin

Bachelor's degree, Computer Science · (2014 - 2018)
